Summary

Self-taught engineer with 3 years of relevant experience in a healthcare technology startup, a small IT services firm, and a large urgent care. Passionate about learning through new experiences. Excel in collaborative and innovative environments.

Experience

Senior Engineer - Total Wellness Innovation - Marietta, GA *(January 2024 – Present)*
- Developing a demo mobile and web app for a competition-winning startup presentation
- Transforming Figma designs into real user interfaces in .NET Maui/Blazor
- Administrating test releases of both IOS and Android releases
- Developing .Net API services for FHIR interoperability
- Implementing Oauth 2.0 functionality into mobile and web products for external healthcare system accounts
- Developing an internal product maintenance tool for our team using .NET Blazor

Software Developer - Qimata Technologies - Marietta, GA *(August 2021 – January 2024)*
- Developed the ATC conferences app for the Atlanta Developer's and Cloud conferences and their 600+ annual attendees using React Native. Early UI designs and layout were created using Figma.
- Developed Python Flask API with PostgreSQL for backend services hosted in Azure used in the ATC app
- Performed general IT tasks as directed by senior staff which included general server maintenance like drive replacement and OS updates

Lab Technician - Wellstreet Urgent Care - Atlanta, GA *(July 2021- August 2022)*

Project

ATC Conferences App - *2023*
- Solo developed using React Native, Python, and PostgreSQL over the span of 3 months
- Designed for the Atlanta Developer's Conference and Cloud Conference with over 600 combined annual attendees
- Allowed for attendees to schedule their day while connecting with and submitting feedback to speakers
